

POSITION

Risk Manager

Build a team that defines
and manages Risk for our
Broking business.

POSITION

Risk Manager

LOCATION

Mumbai

We are looking for someone who has experience in managing risk for online clients. Person should have sound product knowledge, risks and regulations for Equity (incl derivatives), currency and Commodities.

You will

- Set up RMS Systems to manage the risk for MP broking operations.
- Managing the risk exposure through customer limits for online trading in equity, derivatives, currencies and commodities.
- Ongoing testing and automation to introduce new products and ensure seamless functioning.

That's it.

If this sounds like your kind of challenge, take our screening test. We are eager to be impressed by you.

PEOPLE PRACTICES

WFH

We're currently in work-from-home mode. Anyone who's keen to join us is welcome to work from wherever they are comfortable.

Caravan

Every quarter, or when the pandemic allows, we bring the whole team together for a co-working and co-living experience in interesting, safe locations. WFH continues, but it can never replace the human bonds we cherish (and miss) so much.

Gifts of Growth

Every quarter, we come together to appreciate each other's awesomeness, and help each other grow through our challenges. We find this gifting season far more rewarding than performance reviews.

Uppraisals

Every year, we give flat increments across the organisation, plus ESOPs to every person regardless of their role or experience. We've chosen holistic, collective growth over competitive, individual gain.
